Experience

Prudential Financial Inc.

Enterprise Architecture Intern

Newark, NJ

06/18 - Present

- Developed API proxies in Apigee for enforcing policies on inbound and outbound traffic through various applications
- Automated a series of internal form workflows using an API backend developed with Java SMTP clients and AWS Lambda
- Implemented information extraction from X.509 certificates for mutual authentication using Java, Python, and JavaScript
- Created cloud-based notebook application for contrasting Apigee development techniques with Amazon Web Services

Willkie Farr & Gallagher LLP

Application Development Intern

New York, NY

02/18 - 06/18

- Developed cross-platform expense reporting application using Kony Visualizer to automate 1,500 monthly expense reports
- Researched and implemented image segmentation for receipt image splitting using Python, Scikit-Learn, and Flask
- Communicated project progress and expectations with full stack development team and product owner using Agile

Vaco LLC

Google Cloud Student Innovator for Vaco at Google

Hoboken, NJ

10/17 - 02/18

- Collaborated with Google to bring cloud technologies such as compute and serverless to campus
- Led multiple campus-wide events such as tech talks and live demos to collect information for improving Google products
- Held weekly office hours open to all students and faculty for personal, hands-on mentorship in cloud technology

Caring Friends (Startup)

Co-Founder & Android Developer

Hoboken, NJ

10/16 - 10/17

- Communicated project goals, deadlines, and expectations with senior entrepreneurial lead and graphic designer
- Helped lead startup business efforts such as conducting 70+ customer research interviews in areas around Hoboken
- Architected, developed, and deployed Android application with AWS and Firebase for use by employees

Innovation and Entrepreneurship Research Program

Android Researcher

Hoboken, NJ

5/17 - 8/17

- Developed Android library aimed at assisting early-stage startup teams with Android networking with low investment
- Reported weekly progress to academic advisor in entrepreneurship, both orally and in written format
- Led customer research interviews to gain knowledge of problems facing startup teams in terms of data acquisition
